

Chemito

Visual Marks

Introduction

Chemito Technologies Pvt. Ltd. (CTPL) is a one of the pioneer and reputed manufacturers of Laboratory Instruments, Environment Instruments, Technology Products and **Electronic Displays**.

It was a small effort that started in 1961 - The establishment of Toshniwal Instruments. Under the Toshniwal brand name, electronic and electrochemical instruments were introduced in the Indian market. A long journey since then, the company has evolved from being a product manufacturer, to a comprehensive solution provider today.

Chemito - the brand name that was introduced in 1980 is today synonymous with quality and technology at the right price.

The network of 17 customer support centers in India and representation in other countries, help us in efficient customer management.

In addition to its existing ISO Certified manufacturing facilities at Nasik, CTPL has established a new manufacturing facility for VM division at Panvel, which is also ISO Certified.

Being veteran in the industry, CTPL has right combination of young, energetic, experienced and talented people, which it feels, is a big asset.

After acquiring train time indicator and electronic display technology, CTPL has started a new division viz. **Visual Marks**, which caters to many industries like railways, Petroleum, Steel, Pollution Control Boards, Entertainment, Advertising, Media and many more.

With many organizations of international repute under its belt, VM has emerged as one of the important sections of CTPL in a very short span of time.

Under its expansion plan, VM is now ready to introduce Full colour RGB Displays., as well.
