**Sub: Performance of Autoclave**

Dear Sir,

We have been using High Pressure Autoclave from U.S.A. for the last five years for our R&D Project Work. This Autoclave has been used for carrying out organic reactions under High Pressure and also use for Zeolite Synthesis at elevated pressure. This equipment has given consistent performance for the last five years for all our High Pressure work and we have not faced any maintenance problem so far. We are fully satisfied with the performance of this Autoclave.

Thanking you,

Yours faithfully,

DR. A.B. HALGERI,  
DEPUTY GENERAL MANGER (R&D)
