CHEMITO SUPPORTED PMPML BUSES WITH NEXT-STOP ANNOUNCEMENT SYSTEM FOR ENHANCED PASSENGER CONVENIENCE

Pune: Chemito is proud to announce its support to the latest advancement in public transportation by Pune Mahanagar Parivahan Mahamandal Limited (PMPML). The integration of Chemito's state-of-the-art On Board Unit into PMPML buses will soon enable the implementation of an automatic 'Next Stop Announcement' system, significantly improving the journey experience for all passengers.

This innovative system is set to provide great relief to senior citizens, visually impaired, and disabled passengers by offering clear and timely information about upcoming stops. Moreover, passengers who are new to Pune will find this feature particularly beneficial as it will reduce the need to constantly seek assistance from fellow travelers regarding their stops.

With this new system, passengers can look forward to a more independent and convenient journey. The 'Next Stop Announcement' system is also expected to prevent incidents of passengers disembarking at the wrong stop and minimize misunderstandings with the driver and conductor.

PMPML operates bus services on 472 routes across Pune, Pimpri-Chinchwad, and the PMRDA limits. The new announcement system incorporates advanced GPS technology, facilitated by Chemito's On Board Unit. This technology allows passengers to track their bus stops in real-time through the **Aoli PMPML mobile app**.

Chemito is committed to leveraging its cutting-edge technology to enhance public transportation and contribute to the overall convenience and efficiency of city travel. This collaboration with PMPML marks a significant step forward in achieving that goal.
